

## Formica GlossPlus – Leave a lasting impression with high gloss surface design

14 March 2011

Formica is turning heads with the latest in high gloss, high pressure laminate – Formica GlossPlus.

High gloss surfaces are quickly becoming a design favourite in New Zealand and internationally, with their ability to create stunning interiors and give them brilliant shine.

Now, with the introduction of this stylish new range of high gloss surfaces, Formica has again made it easy for designers and specifiers to recreate the latest interior look in residential and commercial spaces, without the premium price tag.

Perfectly on-trend with the desirable gloss finishes seen overseas, the eight solid colours and 11 stone patterns have been chosen to provide surface solutions that can be easily matched with the Melteca Colour Range to create integrated looks that work.

Bring to life benchtops in the striking stone and marble patterns of *Amaretto Stone* and *Alpine Marble*; design a striking centre piece with a kitchen island in intense *Pietro Nero*; or create a lasting impression with the intriguing linear of *Silver Strata* on vertical panels.

The subtle neutrals and calming whites of *Streetlight*, *Warm White* and *Antique Wiluna White* will bring light and life to the smallest of spaces, while *Mist Grey* is a highly fashionable choice for every kitchen.

Formica GlossPlus surfaces are exceptionally durable, scuff and moisture resistance and are easy to maintain. Plus, they are backed by a 7 year warranty, ensuring looks have long-lasting appeal.

Formica GlossPlus is available from April 2011. For further product and warranty information visit [formica.co.nz](http://formica.co.nz)
